## Nature Park Dobratsch: Pure Nature

The Dobratsch shows itself from an especially dreamy side during the cold season, with snowy mountain ranges, steep slopes, angular rocks, mysterious animal footprints and crunching snow underfoot.

Carinthia's oldest nature park went back to being dedicated to gentle tourism several years ago. And this is not just preached, but truly lived here. For Villach's Alp holds something very valuable: an intact, untouched natural landscape with all its fauna and flora that is well worth protecting. For ski mountaineers, cross-country skiers and winter hikers, it's a true paradise. Starting point for those who enjoy their exercise is the Rosstratte at the end of Villach's Alpine street as well as the area of the Alpine Garden. Experienced ski mountaineers start their tour earlier, from Heiligen-

gest. On the summit, everyone will meet again - for a mulled wine and delicious Carinthian treats in the Gipfelhaus. And when the evening comes, snow shoe hiking in the light of the full moon is on the agenda. A real pleasure: Sleighing on the prepared tobogganing hill at the Rosstratte. A snow playground is also to be found here. Not just for the little guests!

**A special tip:** The 10 kilometres of cross-country run in the area of the Alpine Garden. By the way: The Rosstrattenüberel and the Aichingerhütte offer regional delicacies.
